

For Case Workers and Community Providers

Music therapy and neurologic music therapy techniques are clinical and evidence based. Music therapy can be used to support clients in a number of different treatment domains, using preferred music and experiences to better motivate and engage the clients in therapy. When working with Edge Water, the following can be expected:

Intake and Assessment

Personalized Treatment Plan

Quarterly Review of Progress

Analysis of Strengths and Needs

Documentation of Each Session

Collaboration with other Therapies

Quarterly review of progress and development of appropriate changes to the treatment plan as needed.

Music therapists can work alongside other therapists and programs to support common goals specific to each client, or included in a client or groups personalized care plans and IEPs.

Additional funding for Edge Water Therapy services can be accessed through Kalamazoo CMHSAS through respite services, The Children's waiver, and SED waiver programs. Funding is also available as an auxiliary service through Calhoun County's Summit Pointe community mental health. At Edge Water, we're also willing to work with client's individual private health insurance plans as well as provide grant writing services and opportunities for music therapy groups or facility related music therapy services.
